

THE JUDICIARY OF THE

REPUBLIC OF AURORA

CASE NO. 0701 OF 2022

An Aurorian Citizen

v

Network_1

JUDGEMENT

A. Case

1. On 11 February 2022, a complaint has been received by the Judiciary regarding the killing of Citizen Himato0224 using a death potion by Citizen Network_1. (See **Appendix I**)
2. Referring to console records and the image provided by the plaintiff, it showed at the time of Himato0224's death, there was a reduction in number of "death potions" in Network_1's inventory, which proved that the death of Himato0224 was caused using a death potion. Therefore the charge against Network_1 was substantiated.
3. In addition, the Judiciary noted the use of a "death potion", an item used within the picture provided by the plaintiff. The Judiciary is aware that a death potion may instant-kill a person even in creative mode, and is available via using vanilla commands or the hotbar save function, importing items from other servers. Such items/entities would endanger the safety and smooth operation of the nation.

4. In accordance with common law (as previously stated in *Government of Aurora v ErnestNg0927 [2020] AUJUD 1501*) and customary law, obtaining any items (“illegal items”) via the hotbar saving function that may not be obtained using other means within Aurora shall be deemed illegal. That includes the use of death potions, custom spawn eggs etc.
5. Once prosecuted, it may lead to disciplinary actions being taken, such as the repossession of the items, issuing of warning or even temporal ban.

B. Ruling

6. Following a previous judgement (*An Aurorian Citizen v PeterYeung0309 & Chriszeng [2020] AUJUD 3301*), the defendant will be given out 1 temporary warning of 3 weeks.
7. The Judiciary orders that any person in hold of any illegal items shall dispose them before 20 February 2022.
8. In the event where the plaintiff or the defendant does not agree on the judgement, appeal can be made within 14 days to the Judiciary for review with the respective case number.

Appendix I
